

MINNESOTA BUSINESS ENERGY ASSESSMENT

INFORMATION SHEET
MINNESOTA

Program offering

The Business Energy Assessment program offers study funding and electric and natural gas implementation rebates to commercial and industrial customers who improve their building performance through an energy assessment.

Free implementation services are offered to facilitate the customer action on energy-saving opportunities identified in the studies.

Assessment options and customer co-pays

- 1. Commercial Streamlined Assessment**—An affordable, quick to complete assessment focusing on immediate savings from minor repairs, tune-ups, and free energy-saving equipment.
- 2. Industrial Streamlined Assessment**—Whole-facility assessment for small-to-midsize industrial customers.
- 3. Building Assessment**—An assessment that focuses on optimizing existing equipment as well as prescriptive and customer energy-saving opportunities and applicable rebates.
- 4. Targeted Building Assessment**—An assessment that encompasses the same components as the Building Assessment but at a greater depth. A detailed, comprehensive assessment that will be tailored to highly engaged customers that have an expectation of building an ongoing relationship with their study provider and utility.

CUSTOMER CONTRIBUTION

Comparable value \$3,000 to \$7,000

Base:	\$500
-------	--------------
